LEGAL DISCLAIMER

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

LEGAL DISCLAIMER

Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability:

EGW shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your whole investment.

Investment risks:

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

WHO WE ARE?

EcoGreenWorld is a secure crypto transaction platform that completely protects you from being scammed when you want to buy or sell with someone you don't know. EcoGreenWorld protect both parties regardless of how much the transaction is worth. EcoGreenWorld platform offer solutions across a diverse range of use cases. Be it high value, once in lifetime purchases, milestone-based transactions, long dated sales, or even recurring regular transactions, in short, we protect the interests of all parties in contingent based transactions by creating a safe, secure, transparent and smart digital escrow centered ecosystem of crypto payments. EcoGreenWorld we are the strong believer of the fact that extraordinary returns lie in well investigated and developed visionary ideas in hands of leaders who embrace the change to complete this mission, a significant portion of our time and money is always ready to be invested in the world changing and forward looking ideas. It is even more important to build this community to help support each other with this new society that doing more transactions online and keeping our distance from each other EcoGreenWorld has been built with one purpose to build the best-decentralized technology available for people to earn bitcoin as a reward. We are revolutionizing the DeFi protocol with an advanced reflection network. We are the new standard of sending cryptocurrency in a secure way of making transactions by using our Dapp to eliminate the chance of sending your cryptocurrency to wrong address.

OUR MISSION

Our mission is to simplify the transaction process across the globe by offering an alternative to the expensive middlemen generally required in these specific types of transactions. The token will be used for discounts on services, dividends from staking, and as a governance token allowing the community to vote on how foundation funds are spent. Our global business coin is a conceptualized as a smart technologies-anchored ecosystem aimed at solving the current problems associated with current conventional crypto trading & transaction processing services, including the delay in payment processing, fraudulent transactions, and expensive transactions costs. Further research into the smart technologies escrows ecosystems revealed that current financial systems benefit from the ERC-20 technology, which can solve the underlying challenges. Every transaction on EcoGreenWorld is registered on our blockchain to ensure unrivaled security and prove the ownership and origin of each item. Technological advancements in the means of production are the driving force behind the changes in the prevailing system of socioeconomic relations. While man obtained physical freedom, the financial freedom remained under the control of the centralized authority.

VISION OF EGW

EcoGreenWorld aims to be recognized as a platform with unbelievable potential and benefits for investors. We strive to serve our community through Real world real Estate, NFT, Booken app, EcoGreenWorld Bank, Meta-verse and most importantly amazing returns on investment. However, that's just the tip of the iceberg. The EcoGreenWorld token platform is built to extend maximum advantages to our customers through affordable rates on investment, hassle-free staking, and storing of cryptocurrency safely and securely. We envision building an ecosystem that is a decentralized financial system that can only be created by appropriately managing people value, ownership, and reputation. EcoGreenWorld is going to establish an ecosystem to raise your asset value as tokens become scarce. We try to develop an ecosystem built on strong monetary regulations with a robust and decentralized foundation, which users should expect.

Our Vision is to :

- To make blockchain technology and cryptocurrency accessible by real estate.
- To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems.

KEY FEATURES

NFT:

An exclusive reward token called EcoGreenWorld may be obtained by staking NFT. The EGW will be the only method for accessing custom NFT drops on the platform - we call this 'NFT farming'. These custom nfts will include rewards for our gaming suite, access to our VIP Discord channel, priority access to NFT drops and even access to beta test new features, the possibilities are endless. This reduces the amount of EGW in circulation, whilst rewarding token holders for their loyalty. NFT farming will be a core component of EGW ecosystem. The farm is not limited to EGW holders, all EGW holders will be able stake their nfts in to receive EGW token return. By offering NFT staking we can ensure NFT re-sales on the open market are reduced, which should have a positive impact on re-sale prices. It is a play-to-earn gaming metaverse that combines defi yield farming with nfts. Built on the Binance Smart Chain, it allows players to stake nfts to earn rewards in its native cryptocurrency. We envisage a EGW metaverse where users can play with their friends, earn crypto & nfts, and win unique rewards related to their favorite athletes. We may also introduce fungible tokens for in-game purchases on a play-to-earn basis. We believe that making nfts applicable in games creates real value for the entire ecosystem.

KEY FEATURES

Meta-Verse:

EcoGreenWorld will create a 3-D model real estate game for selling and buying real estate through the Blockchain, As it is the most secure and lightning fast way to earn a good wealth. NFT to earn a small percentage commission on future sales. As well as the conventional in-app sale or advertising revenue model, nfts will provide a new in-game economy EGW to generate revenue. This will help to continue attracting elite to the ecosystem. Of course, we will ensure that the EGW is utilized, token holders will be able to earn unique game nfts via our NFT farm, whilst also being able to govern key decisions. As transactions happen on both the buy or sell-side we can take a percentage of the tokens and stake them as liquidity for the exchange of EGW tokens. This will mitigate many issues other tokens experience such as price fluctuations, whales selling, and causing excessive price drops, and provide for confidence in the long term viability of the project as there will continue to be a foundation for the exchange pairs of EcoGreenWorld. A fully-embedded Governance model allows (EGW) holders to regulate the token burn, fee rates, staking rewards, and much more. The token will be used in voting for future project investments. Automatic Liquidity staking is one of the most valuable functions of the EcoGreenWorld.

WHY CHOOSE US?

Open for global participants:

EGW facilitates the transaction and brings them closer to a wider audience. An added benefit of EcoGreenWorld use is that it's completely decentralized, so p2p trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. EGW has no border so these can be used no matter where you are located globally. This also has a huge effect on international payment fees.

The efficiency of payment transactions:

Standard transfers and foreign purchases typically involve fees and exchange costs. Since EcoGreenWorld transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.

WHY CHOOSE US?

Fast and secure:

EGW is different because of its potential features of security, privacy, transparency, blockchain technology, Farming, lending, P2P trading, and NFTs marketplace. We have created a platform to connect people through Solar.

Strong security:

Built and maintained to the highest security practices to ensure our users and their funds are always protected. We provides private and secure proprietary technology applications (app), decentralized exchange with its encrypted communication platform.

Free from corporate and government interference:

Our coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the Inconvenience of typical authorization and waiting period requirements.

OUR SERVICES

A decentralized trading platform on EGW coin will be added, satisfying the needs of fully decentralized payments. Smart EcoGreenWorld connects Tron making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world the dominant cryptocurrency, EGW guarantees outstanding speed token processing and extremely low transaction fees so that the community can easily connect. EcoGreenWorld is an easy, fast, and secure exchange creating a completely new ecosystem, built to facilitate a crypto derivative market where traders have access to a variety of trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way. EGW is going to launch its own decentralized exchange.

- Our goal is to eliminate losing your tokens because you sent them to a wrong address. The receiver will be required to confirm that the transaction was meant for them. This will be done by providing a different version of a private key that was supplied by the sender.
- If the receiver cannot confirm the version of a private key, then the token will be sent back to the sender.
- This adds another layer to the transaction.
- Senders will have the option to use the new way of sending with us.

ECOSYSTEM

Flexible Input Plans:

Strictly Decentralized, token that powers the network, enabling holders to participate in governance decisions and access SLT services.

High Limits, Low Fees:

A fully-embedded Governance model allows EGW holders to regulate the token burn, fee rates, staking rewards, and much more. The token will be used in voting for future project investments.

Easy Payment:

Automatic Liquidity staking is one of the most valuable functions of the EcoGreenWorld protocol. As transactions happen on both the buy or sell-side we can take a percentage of the tokens and stake them as liquidity for the exchange of EGW. This will mitigate many issues other tokens experience such as price fluctuations, whales selling, and causing excessive price drops, and provide for confidence in the long-term viability of the project.

TOKENOMICS

NAME: ECOGREENWORLD

REFLECTION : 4%

BURN : 2%

MARKETING & DEVELOPMENT : 4%

TOKEN DETAILS

Token Name-----EcoGreenWorld
Symbol-----EGW
Network-----etherscan
Decimal-----18
Total Supply-----100,000,000,000,000
Max Supply-----100,000,000,000,000
Contract Address-----
-----0xED86600a0Caca313DdcbDf208B2d03FAdbcDE7fa

Pre-Sale 20%

Reserve 12.5%

Burn 13%

ROAD MAP

PHASE 1

- Create token
- Launch project
- Whitepaper
- List Etherscan
- Smart Contract Audits

PHASE 2

- Coinmarket Listing
- Exchange Listing
- Media Platforms
- Marketing
- Other Decentralized

PHASE 3

- Advertisement on all Social
- Media Platform
- Updated Smart Contract Audits
- Charity donations
- Burning 5% of the total
- when reaching a capital of €10.000

ROAD MAP

PHASE 4

- Multi chain master-node
- Purchase Land for Corporate Ownership
- Updated web 3.0 webside

PHASE 5

- App Development for Token EcogreenWorld
- The capital will be invested for projects for green tecnology
- Donation for food research around the world
